

## School History Data

A complete list of schools ever opened in western Chitwan was prepared using local and regional government records, interviews with residents, and interviews with former school employees, including schools that had closed by the time of data collection. During 1995 and 1996, school histories were collected from every school that had ever been located in the valley, even if it was no longer in operation. Measures were drawn from a combination of school records, interviews with school administrators, and interviews with teachers. For older schools in which none of the current staff knew the early history of the school, or schools that were no longer open, former administrators and teachers were located and interviewed in their homes. Global positioning system equipment was also used to gather the latitude and longitude of each school. Data were collected from 145 schools that ever existed in western Chitwan for the prior fifty years (see Axinn, Barber and Ghimire 1997 for data collection details).

## School History Data

Data Set Name: schist.ssd01

Unit of observation: school

Number of observations: 145

Number of variables: 706

Unique identifier: schlid

Response rate: 100%

Data Format: sas for unix

Sample: \*

Record length: 2,839

File structure: rectangular

Data collection: 1995 to 1996

Date: 09/08/2006
