Terms of Use

The terms of use for this study can be found at:
<http://www.icpsr.umich.edu/icpsrweb/ICPSR/studies/4538/terms>

Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTE FOR # 4538

*Chitwan Valley [Nepal] Family Study: Changing Social Contexts and Family Formation
Neighborhood Distances File, Restricted-Use*

- 1) **Variable rename:** The variables **N2013_HID** to **N2051_HIDS** were renamed from **2013_HID** to **2051_HIDS** due to limitations with SPSS and SAS.

Additional Notes

- 2) **P.I. note regarding measurements:** All distances measurements are in meters. Please note that while distances seem to be measured precisely (to sub-meter values), positional accuracy for the data is accurate to 25 meters on the ground.
- 3) See the Guide to the Western Chitwan ArcGIS Map Document and the accompanying GIS shapefiles for more information on this data.

Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Neighborhood Distances File, Restricted-Use

Variable Name and Label (Total Cases = 171)	Percent of Cases with Missing Values
100.0% (87 of 87 variables)	have 0% Missing Values
0.0% (0 of 87 variables)	have 0% - 1% Missing Values
0.0% (0 of 87 variables)	have 1% - 3% Missing Values
0.0% (0 of 87 variables)	have 3% - 5% Missing Values
0.0% (0 of 87 variables)	have 5% - 10% Missing Values
0.0% (0 of 87 variables)	have 10% - 20% Missing Values
0.0% (0 of 87 variables)	have 20% - 40% Missing Values
0.0% (0 of 87 variables)	have 40% - 99% Missing Values
0.0% (0 of 87 variables)	have 100% missing values

ICPSR 04538

Chitwan Valley [Nepal] Family Study: Changing Social Contexts and Family Formation

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
